

The Hospital of
St John & St Elizabeth

150 years of compassion and excellence

I would just like to say how happy I am with the work that Phil and his team at Pembury did refurbishing the renal unit at St John & St Elizabeths hospital.

The unit was in an old nightingale ward and had been largely untouched for years. It was a major undertaking to strip the whole area out and renovate it. All the dialysis patients had to be temporarily moved to another unit and the pressure was on to get the job done as quickly as possible.

Throughout the weeks of work Phil had the thankless task of co ordinating various outside specialists and keeping myself and estates informed of progress or lack of it, on a regular basis ! He was always available to talk and did a fantastic job of keeping things moving forward. His team were also helpful, hard working approachable and patient.

We re- opened at the beginning of February and all the patients and staff were thrilled to be back. We now have a state of the art dialysis unit and it's a really pleasant environment to work in. The quality of the finish is excellent and I would be delighted to recommend Pembury to anyone considering having work done in the future.

Michelle Powley
Renal unit manager
